The REQUEST [Charleston WV chemical spill](#) has been created by Larry Cseh (LOC3) and you have been assigned as the POC or Alt POC. Please click on the link above to view the record in EHPM.

Below is additional information about the record.

**Type:** ATSDR Technical Assist

**Description:** The ATSDR ERC was contacted via the EOC concerning a request for assistance to WV DOH about a 4-Methylcyclohexanemethanol chemical spill that impacted the WV America Water Company's plant. The plant services 300k people in a six county area. At approximately 11:00 a leak occurred that continued until 18:00. The tank farm was 1 mile upstream from the water intake on the Elk River. The tank contains 30,000 gallons of Crude HCHM.
